DESIGN BY EMOTION

The concept of "JMJ" (Jean Michel Jarre) electronic devices was born in 2005 after the encounter of Jean Michel Jarre, pioneer of Electronic music, composer, sound-designer, performer and creator of a new genre of concert-spectacles, with Roland Caville, successful entrepreneur whose enterprises have always been driven by innovation and design.

JMJ brand became:

"Jarre Technologies: Design by Emotion".

Jarre Technologies aims to produce hi-tech products, allying innovation and quality, with an aesthetic design and at a most competitive retail price.

"Today, functionality and electronic expertise need to be carried and enhanced by genius design. A modern interior will only welcome that aesthetic added value and therefore render the electronic device "desirable" and "must-have".

Jean Michel Jarre.

OUR PHILOSOPHY

Design by Emotion.

OUR MISSION

Put the emotion, desire and pride-to-share,
back into the home-entertainment experience.

OUR VISION

Jarre Technologies will be among the worldwide top 5
Premium Design Hi-Tech brands within 5 years (2017).
